#### Technical Description

The DUNGS double solenoid valve DMV consists of two solenoid valves in one compact unit:

- Automatic shut-off valves as per DIN EN 161 Class A Group 2.
- Two A-valves in one housing
- Double disc valves
- High flow rates
- Max. operating overpressure 0.5 mbar (50 kPa)
- Fast-closing
- Fast-opening (DMV-D) or slow-opening (DMV-DLE) with adjustable fast stroke for start gas rate
- Adjustable main load (DMV-D, DMV-DLE)
- DC solenoid
- Closed position signal contact can be mounted
- Small dimensions, low weight

#### Application

Double solenoid valves are used at places where earlier two single valves were assembled. A large variety of regulation functions can be carried out by combining these valves with DUNGS gas pressure regulation devices and additional components. It does not contain any non-ferrous metals, suitable for gases of up to max. 0.1 vol.% H<sub>2</sub>S, dry. Suitable for gases of families 1, 2, 3 and other neutral gaseous media.

#### Approvals

EC type testing certificate as per:

- EC-Gas Appliances Regulation
- EC-Pressure Equipment Directive

Approvals in other important gas-consuming countries.

## Technical Data

Nominal width	DN 65	80	100	125	
Flanges	Connection flanges as per DIN 2501 part 1 for welding neck flanges as per DIN 2633 (PN16) DN 65 - DN 125, EN 1097-1 Length as per DIN 3202 part 1, series F1 for DN 65 - DN 125				
Nominal diameters	DMV 525/12				
Flange with pipe thread as per ISO 7-1	Rp 2 and their combinations				
Max. operating pressure	500 mbar (50 kPa)				
Solenoid valve V1	automatic shut-off valve as per EN 161: Class A, Group 2				
Solenoid valve V2	automatic shut-off valve as per EN 161: Class A, Group 2				
Closing time	< 1 s				
Opening time	DMV/12 + DMV-D/12: < 1 s DMV-DLE/12: approx. 20 s at room temperature + 20 °C and without fast stroke				
Fast stroke	adjustable (DMV-DLE/12)				
Main load restrictor	adjustable (DMV-D/12, DMV-DLE/12)				
Material used for gas-conveying parts	Housing:	aluminium, steel, no non-ferrous heavy metals			
	Seals at the valve seat:	NBR-based, suitable for gases as per G260/I			
Ambient temperature	-15 °C to +60 °C				
Installation position	Solenoid in upright vertical to horizontal position				
Dirt trap device	Filter integrated We recommend mounting an upstream gas filter to protect the entire gas train. See data sheet gas filter 11.02.				
Measuring gas connection	G 1/4 DIN ISO 228, in the centre before V1 and after V2 G 1/8 DIN ISO 228, on both sides before V1, between V1 and V2, after V2				
Ignition gas connection	Ignition gas flange G 3/4, DIN ISO 228 possible on both sides between V1 and V2				
Voltage / frequency	~(AC) 50 - 60 Hz 230 V -15 % + 10 %, other voltages on request. Standard voltages: ~(AC) 110 V - 120 V, =(DC) 24 V - 28 V				
Power / current draw at~(AC) 230 V, + 20 °C all indications are effective values	Type	Starting power approx. [W]	Holding power approx. [W]	Break-away starting current [A]	Holding current [A]
	DMV 525/12	2 x 65	2 x 16	2 x 0.32	2 x 0.11
	DMV-... 5065/12	2 x 95	2 x 20	2 x 0.54	2 x 0.20
	DMV-... 5080/12	2 x 125	2 x 25	2 x 0.54	2 x 0.20
	DMV-... 5100/12	2 x 125	2 x 25	2 x 0.54	2 x 0.20
	DMV-... 5125/12	2 x 160	2 x 35	2 x 0.70	2 x 0.20
Degree of protection / switch-on duration	IP 54 / 100 % duty				
Electrical connection	Plug-in connection as per DIN EN 175301-803				
Radio interference suppression	Interference level N				
Closed position signal contact	Type K01/1 (DIN tested) can be mounted at V1 and V2
